

HOZELOCK

Scandinavian - 2023

Founded in 1959 in the village of Haddenham, England, our drive has always been to develop technically perfect products as part of a system

Our first product was the world's first plastic hose connector – the Hoze-Lock.

Today, we are a global garden equipment manufacturer with our head office in Birmingham (UK).

Over 75% of our watering and spraying products are made in Britain and in France, with the remaining 25% built at our overseas factories in Malaysia, Taiwan, and China.

Committed to European manufacturing, Hozelock is investing in its machinery to increase its capabilities and meet the demand of consumers as interest in gardening continues to grow

At our factory in Birmingham, five new Sumitomo Demag injection moulding machines have been implemented to upgrade old machinery and increase manufacturing capacity. These machines include an impressive 830 tonne machine, moulding larger pieces such as side discs for carts and reels - it can produce over 5500 discs in one day.

The 280 tonne twin shot machine efficiently creates the soft touch casings for our hose end connectors and will produce over 3 million in one year! In addition to being quicker and more reliable, these machines are greener - using less than a third of the energy to power than the equivalent machine they are replacing.

HOZELOCK

New for 2023

Save water
using the
3D control
for precise
coverage

Oscillators with full 3D control

Rectangular Oscillating Sprinklers

- 1 Flow Control**
Fine tune the spray area to make every drop count.
- 2 Stop Water at the Sprinkler**
Stay dry when moving or adjusting the sprinkler.
- 3 Adjustable Direction**
Choose how far to water on each side of the sprinkler.
- 4 Class Leading Motor**
Giving larger coverage without moving the sprinkler.
- 5 Adjustable Width** (AquaSave Pro only)
Take control of individual jets and avoid wasted water by changing the width to suit your garden.
- 6 Metal Spray Bar**
High precision jets give a more defined spray pattern.

The hose nozzle for every garden task

3-in-1 Nozzle Plus

Introducing the 3-in-1 Nozzle Plus with 3 spray patterns that simply clicks and connects to your Hozelock system.

The nozzle has an ergonomic design with soft touch grips that effortlessly moves from one spray pattern to another.

Twist & Go! - Twist the nozzle to your desired spray pattern and go!

This innovative nozzle has 3 spray patterns:

Rose - NEW gentle spray for delicate watering of flowers, plants and seedlings.

Cone - Water large areas and clean your garden space.

Jet - Powerful spray to blast away mud and dirt and breeze through your tougher cleaning jobs.

Perfect for your balcony, terrace or small garden

Superhoze City

The new Superhoze City bags include all a start-up gardener needs for city life with small outdoor spaces such as balconies, terraces and small gardens.

The versatile and durable bag provided has been inspired to help gardeners with a multitude of tasks such as weeding and pruning through to watering and storage solutions.

The Superhoze City bag includes a 7.5m Superhoze and a Rose Spray gun. Pair with a Hozelock indoor tap connector if you don't have an outdoor tap. Go for the Superhoze City Plus bag and upgrade to a 15m Superhoze plus an additional Multi Sprinkler, ideal for city gardens with a small lawn.

The woven, durable, lightweight hose that expands up to 3x its original length

Wonderhoze

Following the success of the revolutionary product

Superhoze, Hozelock is strengthening their brand position in the alternative hose market by launching a new expanding hose product. The new Wonderhoze has been designed to deliver comfort, ease and convenience to your watering needs while remaining strong and durable - it is supplied with a 5 year guarantee for peace of mind. Made from a woven fabric, which is soft and tactile for the user, Wonderhoze is available in 12.5m and 25m lengths, making it ideal for small to medium sized gardens.

The key product feature is the expandability of the hose, as it is able to expand up to 3x its length once full of water.

The inclusion of a smooth inner tube ensures a consistent and effective water flow, plus anti-leak connectors, compatible with all Hozelock systems, prevent water waste. As the pressure of water pumping through the hose is constant, Wonderhoze will not kink or twist. Due to the expanding nature of the product and it retracting when not in use, the hose can be put away with ease when compared to traditional PVC hose products and can be simply stored in a compact way rather than taking up space in your garden.

Hot shower anywhere, naturally and free

Outdoor Shower

Combining nature and technology to produce a refreshing outdoor shower experience.

The Outdoor Shower uses the power of the sun to heat 8 litres of water up to 60°C.

The tap mixer allows the shower to heat to your ideal temperature without the use of any electricity.

Ideal for rejuvenating after the pool, hot tub, travelling or even camping. Taking the shower with you is simple and effective with an easy to build design, along with a total weight of only 7KG, moving your solar-powered shower location is easy and convenient.

Hose Storage

Keep your hose tidy, protected and ready to use with a fuss-free storage solution from Hozelock.

Our reels and carts make it a breeze to get water where you need it around the garden.

Use a compact reel to get the most out of small gardens and balconies, or choose the comfort and practicality of automatic rewind and automatic layering for larger gardens.

Auto Reel - the automatic rewind hose reel

Watering your garden and storing your hose is so easy with Auto Reel.

It smoothly unwinds only the amount of hose that you need.

When you are finished, the automatic rewind system effortlessly stores the hose away, with no kinks or tangles.

Use all over your garden

The multi direction wall hanger rotates 180° to follow you around the garden or sit neatly against the wall.

Always ready to go

The built in hose stop prevents the hose fully retracting so it is easily available every time.

Convenient storage

The hanger on the 2401, 2402 and 2403 has storage space for spray guns and accessories to help keep your garden tidy.

Quick to fit or remove

The wall hanger design and carrying handle means you can quickly put the Auto Reel on the wall or take it off again.

Safe and secure

Features a child lock for reassurance and a padlock* fixing point for security.

*Padlock not included.

Tuffhoze - advanced hybrid hose technology

Advanced hybrid garden hose, combining the best of two hose technologies.

Traditional PVC:

- Dura-Tech inner core for incredible flexibility and maximum strength.
- High pressure burst resistance 40+ bar, in conjunction with the outer textile layer.
- Constant, high water flow even at low temperatures.
- Guaranteed length.

Textile:

- Tuff-Fibre woven technology ensures enhanced durability for long lasting wear.
- Amazingly flexible, effortless to manoeuvre and store.
- Kink free & ultra lightweight.
- UV resistant & easy to clean.

Includes:

Compared to traditional hoses:

✓ Up to 50% lighter

✓ Kink free & easy to manoeuvre

✓ Super tough & durable

1 Hozelock quick connect system
Compatible with all accessories.

2 Durable Flexi-Nut
Lightweight, flexible anti-fold collar to avoid creases in the hose and maximise water-flow.

3 Guaranteed leak-free fittings
Ensures a water tight connection.

4 Dura-Tech PVC inner core
For maximum flexibility and strength.

5 Tuff-Fibre woven technology
Ensures enhanced durability and ultra light-weight.

Not all connectors are made equal, see what makes ours the best

1 Water Stop Valve (AquaStop only)

Manufactured from ABS for impact resistance and rigidity. Stops water after removing the watering device.

2 Connection Grip

Manufactured from Dupont Delrin® Acetal with a silicone additive for ease of use. Triple connect point for the strongest possible connection.

3 Outer Sleeve

Manufactured from ABS for impact resistance and strength with soft touch over-moulding for an enhanced grip.

4 Tough Inner Core

Manufactured from Dupont Delrin® Acetal, one of the most crystalline engineering thermoplastics, to bridge the gap between plastics and metals.

5 Connection Grip

Polypropylene teeth stay resistant to repeated stress and provide a secure hose clamp.

6 Hose Tail (Plus and Pro only)

Manufactured from tough, but flexible Polypropylene for a secure hose connection that prevents kinking.

A man with a beard and short dark hair, wearing a dark blue button-down shirt and khaki shorts, is smiling while holding a white garden hose. He is spraying water from a red and yellow nozzle onto a variety of colorful flowers, including purple agapanths and red geraniums, in a garden bed. The background shows a stone wall and more greenery under a clear blue sky.

Hose End

At Hozelock, we specialise in providing you with the ideal hose end device to match your watering and outdoor cleaning needs.

Features such as lockable flow triggers and soft-touch grips make watering comfortable and hassle free.

Oscillators with full 3D control

1 Flow Control

Fine tune the spray area to make every drop count.

2 Stop Water at the Sprinkler

Stay dry when moving or adjusting the sprinkler.

3 Adjustable Direction

Choose how far to water on each side of the sprinkler.

4 Class Leading Motor

Giving larger coverage without moving the sprinkler.

5 Adjustable Width (AquaSave Pro only)

Take control of individual jets and avoid wasted water by changing the width to suit your garden.

6 Metal Spray Bar

High precision jets give a more defined spray pattern.

Automatic Watering

Control your garden watering with Hozelock's range of Automatic Watering products - an effective way to save you time, water and effort.

Combine controllers with components to create a bespoke system that can be easily adapted to any outdoor space.

Build Your Own: **A** Tap Connection - connect the system to your tap

The tap connection is vital.
It connects the watering system
to the mains water supply.

There are three different ways to make
this connection.

Always use a pressure regulator to control the water pressure to
ensure the best performance.

All installations below can be automated by adding a Hozelock
Water Contoller.

Remote Connection

To connect to an area that does not
reach your tap:

Cut a section of hose.

Add Hose Connectors to each end.

Connect the hose and Pressure
Regulator (7022) together.

Attach to a tap with a
Threaded Tap Connector.

- Hose - Page 12-19, 35, 37 & 41
- Tap Connectors - Page 21-22
- Hose Connectors - Page 24-25

Direct Connection

To make a direct
connection to the watering
system, screw the
Pressure Regulator (7022)
directly onto your outside
tap or Automatic Water
Controller.

- Controllers - Page 39-40

Total Flexibility

For the most flexible connection,
use a 4-Way Tap Connector (2150)
and screw the Pressure Regulator (7022)
onto one of the four outlets.

- Multi Tap Outlets - Page 22

Build Your Own: **A** Tap Connection - connect the system to your tap

Automate your system by adding an Automatic Watering Controller.

Water even when you're away on holiday.

Automatic Watering Controllers are easy to set up and operate.

Simply attach them to your garden tap, set the timer for when you want the water to come on, for how long, and how often, turn on and forget about it!

Select Plus Controller

For ultimate control of your automatic watering, the New Select Controller Plus has the flexibility to programme any time, any day and for any duration, the user may schedule watering with a maximum of three programmes per day.

- The large LCD screen displays all the programme information and can be set up and easily adjusted using the 'Rotate and Push button'.
- Further features include a 'Rain delay' to pause watering as per the weather forecast and a 'Water now' function for immediate watering that will override the schedules for a quick soak of the garden.
- Not sure how to programme your watering? With the Select Controller (2220) you needn't worry, it comes with 16 pre-set programmes to suit you and your garden.

Sensor Controller

Sunrise and sunset is the best time to water your garden to avoid leaf scorch and excessive evaporation.

- Sensor Controllers include a daylight sensor that automatically adjusts your daily watering schedule to start at sunrise or sunset.
- Both units are supplied ready to use with the most popular watering schedule of twice a day for 10 minutes.
- Simply insert batteries to get started.

Cloud Controller

Control your garden watering from your mobile phone! It doesn't matter if you are on holiday or at work - your plants will no longer need to suffer if weather conditions change.

- Easy to use app to control your garden watering from your mobile (Apple or Android operating system) with Hozelock hub and remote tap unit.
- App allows you to remotely set, pause and adjust watering schedules.
- App includes a local weather summary and push notifications to keep you informed about changes to weather patterns.
- Ideal for when you are away from home and weather conditions change, to remotely pause and adjust schedules.
- Each hub can control up to 4 remote tap units.

Build Your Own: Drippers for precise watering

To prevent leaf scorch and plant diseases, the micro drippers deliver the water at the base of the plant.

Drippers are used at the base of plants to provide very precise watering to the roots - perfect for saving water!

They are very versatile and can be used in pots on balconies or to water shrubs in your flowerbed.

Some of the drippers, with an integrated pressure compensating technology, guarantee the water flow rate even for sloping ground.

Build Your Own: Sprinklers for larger areas

Sprinklers deliver a fine spray over a larger area to water multiple plants

This can mean a quicker installation and less components to purchase but be sure that the water is being directed as close to each plant's base as possible.

Different spray angles, area coverage and adjustable flow can allow you to target the water specifically.

Ideal for your flowerbeds, vegetable patches and hedgerows.

Natural Gardening

BioMix - the eco-friendly solution to take care of your plants

Produce homemade nutrient-rich liquid feed out of plants such as nettles and comfrey.

An efficient way to fertilise your plants and to prevent plant diseases.

The closed tank has a lid and mixing action to ensure that the leaves decompose quickly whilst the pungent smell is contained within the mixer.

Easy to use filter to drain the liquid and integrated tap to recover the fertiliser.

How to use it?

- 1 Cut 1kg of plants and place them inside the tank.
- 2 Add 10L water.
- 3 Close the lid, and stir thoroughly every 2 days.
- 4 After about 10-15 days, when there are no longer bubbles rising to the surface, the maceration is complete.
- 5 Filter.
- 6 Recover the liquid fertiliser in an opaque drum.
- 7 Dilute your plant fertiliser with water. The dilution is indicated in the usage booklet. (between 5% and 20%)

Use it with a sprayer or watering can.

EasyMix 2-in-1 Composter

Tumbling composter for the easy mixing of home and garden waste.

- 3 times faster than conventional composters: compost ready in just 6 to 8 weeks.
- Roll the drum around your garden to distribute the compost with ease.
- Reservoir collects the compost juice, with integrated “Click & Spray” hose applicator to enrich your garden soil.
- The enclosed lid with lockable lid prevents pests and bad smells.
- Compact design - it will easily find a place in the garden, garage or balcony.
- Manufactured with more than 90% recycled plastic and 100% recyclable.

How to use it?

- 1 Put the waste in the composter and lock the lid.
- 2 Turn the drum to mix the waste and accelerate decomposition for quicker composting.
- 3 The compost is ready after only 6 to 8 weeks of resting. Roll the drum around your garden to distribute the compost.
- 4 Collect your compost juice, a rich liquid plant food, using the tank under the composter.
- 5 Enrich your garden soil by connecting the “Click & Spray” tank to your garden hose.
- 6 Rinse the tank after use.
