

# HOZELOCK

Scandinavian - 2024

# At Hozelock, we aspire for a more sustainable future

Our goal is to help gardeners enjoy their garden in a more sustainable way through our innovative product solutions. Our initiatives focus on improving the sustainability of our products, packaging, and manufacturing processes. We are also committed to developing sustainable practices in product development and operational activities.

## Reuse

Our objective is to continue researching and testing new ways to use recycled materials in the manufacturing of Hozelock products, without compromising their quality and durability.

Since the beginning of 2022, all Hozelock knitted hoses have been manufactured using 40% recycled PVC.

For 2024, we have increased this to 70% recycled PVC.

This amounts to saving 45 million plastic bottles per year.

The EasyMix 2-in-1 composter is made from 90% recycled plastic, and is 100% recyclable.

The amount of card used for our spray gun headers has been reduced by a third. The new headers are 34% smaller and 100% recyclable. The change is being made across our standard guns range, saving 2.5 tonnes of card per year.

## Renew

Our after-sales service offers a wide range of spare parts and accessories for both our current and obsolete products, providing a sustainable solution for the environment.

Over 80% of our products are manufactured in our factories in the UK and Europe.

Spare parts are available for all products for a minimum of 10 years.

Our products are designed to save water. Our irrigation systems can help save up to 70% on your water usage. There is also the option to link Hozelock watering timers with rainwater harvesting setups.

## Recycle

We're reducing the weight, dimensions and materials of our packaging to continue on the path to a more sustainable future. To achieve this, we aim to use as much recycled, recyclable, and compostable material as possible. We're also making our packaging smaller and lighter, further reducing our carbon footprint.

Superhoze packaging has transitioned from plastic boxes to sustainable cardboard that is 100% recyclable, compostable and made from renewable FSC sources. This change saves over 94 tonnes of plastic waste per year.

New for 2024

The hose  
that puts  
itself away...  
anywhere!

Experience the ultimate in  
garden hose storage with the  
latest innovation from Hozelock,

## Auto Reel Mobile

This new hybrid hose system blends the premium features of our best-selling Auto Reel range with optimum portability, for effortless watering like never before!

The practical wheeled design is ideal for gardeners who require an automatic reel, but prefer not to permanently fix the unit in one place. Simply wheel the Auto Reel Mobile to the desired location and unfold the front leg to anchor it to the ground. Pull out as much hose as is required - the integrated auto-rewind system ensures a smooth, controlled rewind with no kinks or tangles.

Once watering is complete, the front leg can be folded back under the cart ready to wheel away. The compact size stores neatly in a shed or garage, leaving the garden clutter-free.

With a generous 35m hose length and the multi-functional 3-in-1 nozzle, the Auto Reel Mobile tackles any watering task quickly and easily – leaving you with more time to enjoy your garden!

## A sleek indoor composter for recycling organic waste

### Bokashi 15L

For consumers who don't have an outside space or who want a composter that's always close at hand in the home, the Bokashi is the ideal ally, thanks to its compact 15L format and sleek design that will fit in with any interior.

#### Bokashi allows you to :

- Reduce and recycle household waste (by up to 30%).
- Make your own compost juice to enrich the soil for your plants (dilute 1/100).

#### Thanks to its innovative design, the Bokashi is easy to use:

- Telescopic tap for collecting compost juice.
- Clever system for storing accessories under the lid so they're always to hand.
- Ergonomic lid with hermetic seal to prevent odours.
- Wide opening for clean filling.

## The compost bucket, compact and stylish for the kitchen

### Kitchen 3,5L

#### Ideal for storing kitchen waste before composting:

- To avoid opening the Bokashi several times a day, bearing in mind that fermentation must take place without air (anaerobic bacteria).
- To collect kitchen peelings for several days before putting them in the garden composter, not always easy to access.
- To reduce handling and odours. With its discreet, elegant design, it will blend in perfectly with your kitchen worktop.
- Easy to clean, dishwasher safe.
- Made in France from 50% recycled plastic.

## Ever more trendy triggers

### T0.80, Kaléido, Pulsar 1L, T1/T2 Evolution

For 2024, the range of Hozelock triggers and small sprayers is changing colours to match the latest garden and home trends: terracotta pink, beige, olive green, turmeric yellow and deep blue.

Most models also come with a 360° function for spraying anywhere, even under inaccessible leaves.

## At Hozelock, sustainability lies at the heart of our mission.

We are excited to share our commitment to increase the eco-friendliness of our products, packaging, and manufacturing processes. For the upcoming 2024 season, we are proud to announce that our entire knitted hose range, including the popular Ultimate, Ultramax, and Ultraflex hoses, will be crafted from an impressive 70% recycled materials.

This substantial achievement is the result of our dedication to evolving our hose construction and transitioning to recycled PVC materials. In 2022, we took a significant step towards sustainability by producing the knitted hose range with 40% recycled materials. Now, we are taking it even further!

Throughout this transformative journey, our top priority has been to ensure that quality and performance remain uncompromised. Rigorous testing has been conducted to guarantee that every hose maintains the high standard our customers expect from Hozelock. By implementing this change, we are proud to remove more than 900 tonnes of virgin PVC material from our range, making a positive impact on the environment while providing gardeners with reliable, eco-conscious watering solutions.

# Hose Storage

Keep your hose tidy, protected and ready to use with a fuss-free storage solution from Hozelock.

Our reels and carts make it a breeze to get water where you need it around the garden.

Use a compact reel to get the most out of small gardens and balconies, or choose the comfort and practicality of automatic rewind and automatic layering for larger gardens.

## Auto Reel Mobile - the automatic rewind hose system

This new hybrid hose system blends the premium features of our best-selling Auto Reel range with optimum portability, for effortless watering like never before

**The hose that puts itself away... anywhere**

### 1 Automatic rewind cart with brake system

Pull the hose to easily unwind; the mechanism automatically locks at regular intervals to prevent accidental retraction. The braking mechanism and layering system ensures a smooth, controlled rewind with no kinks or tangles.

### 2 Large wide wheels

Large wide wheels ensure exceptional manoeuvrability and mobility.

### 3 Front kickstand

Unfold the front leg and click into place for stability when watering, then fold away for easy storage.

### 4 Premium kink-resistant hose

The premium 35m Hozelock Automax hose, including an extra-long 5m of feeder hose, is kink resistant, ensuring your garden is watered with minimal fuss.

### 5 Child lock

Features a child lock to secure the hose for reassurance.

### 6 3-in-1 Nozzle included

A 3 spray pattern nozzle for all your cleaning and garden tasks, including a fine rose spray for gentle watering of roots and flowers and an improved cone pattern for quick watering of larger beds or vegetables. A jet pattern provides powerful cleaning for garden tools and outdoor furniture.

### 7 Adjustable handle and feeder hose tidy

The adjustable handle with park points keeps the feeder hose and nozzle tidy.

### 8 Accessory storage

The rear basket allows for convenient storage of accessories and garden tools.

# Auto Reel - the automatic rewind hose reel

25-2403

\*Terms and conditions apply. [www.hozelock.com/guarantee](http://www.hozelock.com/guarantee)

Watering your garden and storing your hose is so easy with Auto Reel.

It smoothly unwinds only the amount of hose that you need.

When you are finished, the automatic rewind system effortlessly stores the hose away, with no kinks or tangles.

### Use all over your garden

The multi direction wall hanger rotates 180° to follow you around the garden or sit neatly against the wall.

### Always ready to go

The built in hose stop prevents the hose fully retracting so it is easily available every time.

### Convenient storage

The hanger on the 2401, 2402 and 2403 has storage space for spray guns and accessories to help keep your garden tidy.

### Quick to fit or remove

The wall hanger design and carrying handle means you can quickly put the Auto Reel on the wall or take it off again.

### Safe and secure

Features a child lock for reassurance and a padlock\* fixing point for security.

\*Padlock not included.

# Fittings

Simply click & connect!  
Hozelock fittings provide quick and easy connections between the tap, garden hose and accessories.

Made from the highest quality materials they are designed to fit a variety of taps providing a secure leak-free connection every time.

Upgrade to a Pro metal fitting for added strength and durability, plus the added benefit of a 3 year guarantee.

## Key:

 Products with a 2 year guarantee or more

 Products that come complete with wall fixings

**Pack Quantity** - The number of products in an outer carton

**Info** - The Scandinavian product code

# Not all connectors are made equal, see what makes ours the best

- 1 Water Stop Valve** (AquaStop only)  
Manufactured from ABS for impact resistance and rigidity. Stops water after removing the watering device.
- 2 Connection Grip**  
Manufactured from Dupont Delrin® Acetal with a silicone additive for ease of use. Triple connect point for the strongest possible connection.
- 3 Outer Sleeve**  
Manufactured from ABS for impact resistance and strength with soft touch over-moulding for an enhanced grip.
- 4 Tough Inner Core**  
Manufactured from Dupont Delrin® Acetal, one of the most crystalline engineering thermoplastics, to bridge the gap between plastics and metals.
- 5 Connection Grip**  
Polypropylene teeth stay resistant to repeated stress and provide a secure hose clamp.
- 6 Hose Tail** (Plus and Pro only)  
Manufactured from tough, but flexible Polypropylene for a secure hose connection that prevents kinking.

## Oscillators with full 3D control

- Flow Control**  
Fine tune the spray area to make every drop count.
- Stop Water at the Sprinkler**  
Stay dry when moving or adjusting the sprinkler.
- Adjustable Direction**  
Choose how far to water on each side of the sprinkler.
- Class Leading Motor**  
Giving larger coverage without moving the sprinkler.
- Adjustable Width (AquaSave Pro only)**  
Take control of individual jets and avoid wasted water by changing the width to suit your garden.
- Metal Spray Bar**  
High precision jets give a more defined spray pattern.

# Automatic Watering

Control your garden watering with Hozelock's range of Automatic Watering products - an effective way to save you time, water and effort.

Combine controllers with components to create a bespoke system that can be easily adapted to any outdoor space.

# Build Your Own: **A** Tap Connection - connect the system to your tap

The tap connection is vital. It connects the watering system to the mains water supply.

There are three different ways to make this connection.

Always use a pressure regulator to control the water pressure to ensure the best performance. All installations below can be automated by adding a Hozelock Water Controller.

### Remote Connection

To connect to an area that does not reach your tap:  
Cut a section of hose.  
Add Hose Connectors to each end.  
Connect the hose and Pressure Regulator (7022) together.  
Attach to a tap with a Threaded Tap Connector.

- Hose - Page 13-20, 36, 38 & 42
- Tap Connectors - Page 22-23
- Hose Connectors - Page 24-25

### Direct Connection

To make a direct connection to the watering system, screw the Pressure Regulator (7022) directly onto your outside tap or Automatic Water Controller.

- Controllers - Page 40-41

### Total Flexibility

For the most flexible connection, use a 4-Way Tap Connector (2150) and screw the Pressure Regulator (7022) onto one of the four outlets.

- Multi Tap Outlets - Page 23

Code	<b>28-7022-1</b>

# Build Your Own: **A** Tap Connection - connect the system to your tap

Automate your system by adding an Automatic Watering Controller.

Water even when you're away on holiday.

Automatic Watering Controllers are easy to set up and operate.

Simply attach them to your garden tap, set the timer for when you want the water to come on, for how long, and how often, turn on and forget about it!

## Select Plus Controller

For ultimate control of your automatic watering, the New Select Controller Plus has the flexibility to programme any time, any day and for any duration, the user may schedule watering with a maximum of three programmes per day.

- The large LCD screen displays all the programme information and can be set up and easily adjusted using the 'Rotate and Push button'.
- Further features include a 'Rain delay' to pause watering as per the weather forecast and a 'Water now' function for immediate watering that will override the schedules for a quick soak of the garden.
- Not sure how to programme your watering? With the Select Controller (2220) you needn't worry, it comes with 16 pre-set programmes to suit you and your garden.

### Sensor Controller

Sunrise and sunset is the best time to water your garden to avoid leaf scorch and excessive evaporation.

- Sensor Controllers include a daylight sensor that automatically adjusts your daily watering schedule to start at sunrise or sunset.
- Both units are supplied ready to use with the most popular watering schedule of twice a day for 10 minutes.
- Simply insert batteries to get started.

### Cloud Controller

Control your garden watering from your mobile phone! It doesn't matter if you are on holiday or at work - your plants will no longer need to suffer if weather conditions change.

- Easy to use app to control your garden watering from your mobile (Apple or Android operating system) with HozeLOCK hub and remote tap unit.
- App allows you to remotely set, pause and adjust watering schedules.
- App includes a local weather summary and push notifications to keep you informed about changes to weather patterns.
- Ideal for when you are away from home and weather conditions change, to remotely pause and adjust schedules.
- Each hub can control up to 4 remote tap units.

# Build Your Own: Drippers for precise watering

To prevent leaf scorch and plant diseases, the micro drippers deliver the water at the base of the plant.

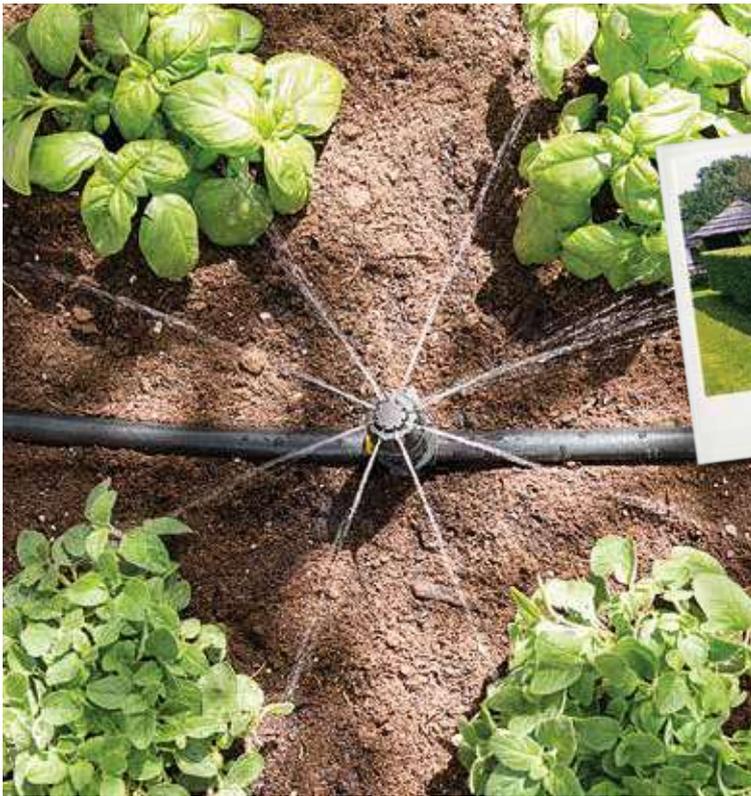

Drippers are used at the base of plants to provide very precise watering to the roots - perfect for saving water! They are very versatile and can be used in pots on balconies or to water shrubs in your flowerbed.

Some of the drippers, with an integrated pressure compensating technology, guarantee the water flow rate even for sloping ground.

Automatic Watering

# Build Your Own: Sprinklers for larger areas

Sprinklers deliver a fine spray over a larger area to water multiple plants

This can mean a quicker installation and less components to purchase but be sure that the water is being directed as close to each plant's base as possible.

Different spray angles, area coverage and adjustable flow can allow you to target the water specifically.

Ideal for your flowerbeds, vegetable patches and hedgerows.

# Natural Gardening

Get into green with natural gardening. Today's gardeners are reaching less for chemicals and more for organic and natural solutions to create their green garden.

Gardens can flourish naturally with the help of Hozelock's new Pure range - a collection of gardening equipment that helps consumers to really connect with their gardens and to care for the environment at the same time.

Combining design features that ensure the highest effectiveness and ease of application for natural products, it's a sure recipe for success.

# Bokashi composter - kitchen composter

## How to use it?

- 1 Pour in your food waste
- 2 Pack the waste to eliminate air pockets
- 3 Place 20g of Bokashi activator between each layer of waste and close the lid.
- 4 Collect the liquid fertiliser every 3-5 days. This juice is used as plant fertiliser, dosage 1/100.
- 5 Once the Bokashi has been filled, leave to ferment for 14 days, then empty the contents of the bucket into a garden compost bin or bury it in the ground.

\*Depending on the waste, it may take longer to extract the "juice".

# EasyMix 2-in-1 Composter

Tumbling composter for the easy mixing of home and garden waste.

- 3 times faster than conventional composters: compost ready in just 6 to 8 weeks.
- Roll the drum around your garden to distribute the compost with ease.
- Reservoir collects the compost juice, with integrated “Click & Spray” hose applicator to enrich your garden soil.
- The enclosed lid with lockable lid prevents pests and bad smells.
- Compact design - it will easily find a place in the garden, garage or balcony.
- Manufactured with more than 90% recycled plastic and 100% recyclable.

## How to use it?

- 1 Put the waste in the composter and lock the lid.
- 2 Turn the drum to mix the waste and accelerate decomposition for quicker composting.
- 3 The compost is ready after only 6 to 8 weeks of resting. Roll the drum around your garden to distribute the compost.
- 4 Collect your compost juice, a rich liquid plant food, using the tank under the composter.
- 5 Enrich your garden soil by connecting the “Click & Spray” tank to your garden hose.
- 6 Rinse the tank after use.

# BioMix - the eco-friendly solution to take care of your plants

Produce homemade nutrient-rich liquid feed out of plants such as nettles and comfrey.

An efficient way to fertilise your plants and to prevent plant diseases.

The closed tank has a lid and mixing action to ensure that the leaves decompose quickly whilst the pungent smell is contained within the mixer.

Easy to use filter to drain the liquid and integrated tap to recover the fertiliser.

### How to use it?

- 1 Cut 1kg of plants and place them inside the tank.
- 2 Add 10L water.
- 3 Close the lid, and stir thoroughly every 2 days.
- 4 After about 10-15 days, when there are no longer bubbles rising to the surface, the maceration is complete.
- 5 Filter.
- 6 Recover the liquid fertiliser in an opaque drum.
- 7 Dilute your plant fertiliser with water. The dilution is indicated in the usage booklet. (between 5% and 20%)  
Use it with a sprayer or watering can.

## Gas Thermal Weeders - weed without chemicals

The most powerful cordless weeder on the market. Safe weeding, 2x faster, 4x more economical.\*

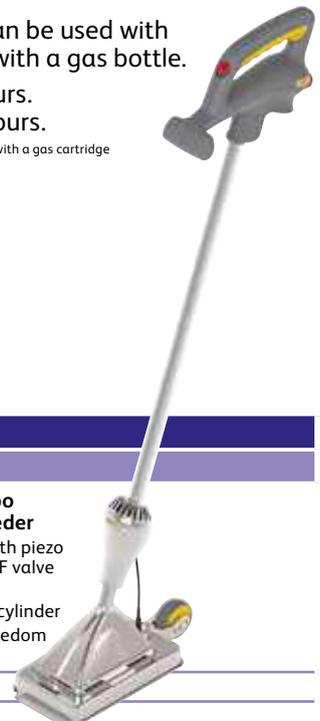

- Secure weed control thanks to infrared technology: the flame, safely inside the shield, heats the ceramic plate up to 800 °C which will cause a thermal shock to kill the weed.
- Weed large areas with the large 12 x 20cm ceramic plate.
- This product is 2-in-1: it can be used with a gas cartridge and also with a gas bottle.
- Gaz cartridge: up to 3 hours.  
Gas cylinder: up to 122 hours.

\*compared to a standard Gas Weeder operating with a gas cartridge
