

HOZELOCK

DK  FIN  NOR  SWE  Nordics - 2026

New for 2026

Jet Plus

Powerful, compact, and ready for anything, the Jet Plus spray gun is perfect for both tough cleaning jobs and everyday garden watering.

Multi Plus

Watering just got easier with the Multi Plus Spray Gun – designed for comfort, control, and complete versatility.

With seven spray patterns to choose from, including Aerated Perlator, Fine Rose, Jet, Cone, and more, it's ideal for everything from delicate seedlings to powerful cleaning.

The ergonomic front trigger, thumb-controlled flow, and trigger lock offer effortless one-handed use, even during extended watering.

A quick-connect system makes swapping tools simple, while the robust metal connection guarantees a secure, drip-free fit.

Whether you're caring for flowers or tackling weekend chores, the Multi Plus is your garden's best companion.

Flexi Pro

Hardwearing. Everyday. Effortlessly Reliable.

This is the go-to garden hose for anyone who wants everyday performance with long-lasting quality. Designed in Great Britain and backed by a 25-year guarantee, the best choice in braided garden hoses – perfect for regular garden use, season after season.

Strong where it matters

Reinforced with a thick, visible braided layer, this hose stands up to daily wear and tear without cracking or crushing.

Smooth handling

Its controlled flexibility makes it easy to unroll, move, and store – no kinks, no fuss.

Pressure-resistant

Withstands up to 35 bar of pressure, giving you dependable performance for all your watering needs.

Remains flexible with protection against brittleness and cracking

Thanks to its UV-resistant outer layer and high recycled PVC content, this hose is specially engineered to resist sun damage and material fatigue, helping it to remain supple and crack-free season after season.

Eco-friendly build

Made with up to 70% recycled PVC, combining durability with sustainability.

UV-resistant & weatherproof

Built to last through sun, rain, and changing seasons – no fading, no flattening.

Clean, modern look

A simple, sleek design that fits right into any garden setup.

Rooted in innovation. Growing greener every day.

At Hozelock, we've been helping gardeners care for their outdoor spaces since 1959 – starting with the world's first plastic hose connector, made in the village of Haddenham, England.

Today, we're still proud to design and manufacture most of our products in Britain and France, keeping our carbon footprint lower and quality standards high. As gardening grows in popularity, so does our responsibility to do things better.

That's why we've recently upgraded our Birmingham factory with new energy-efficient machinery that uses a third less power than before – reducing waste and supporting more sustainable production. We now produce over 3 million soft-touch connectors a year using smarter, greener technology.

We believe gardening and sustainability go hand in hand – and we're committed to growing with purpose, for people and the planet.

HOZELOCK

New for 2026

Hose Storage

No more tangled hoses or messy corners. Hozelock's reels and carts make storing your hose easy and make keeping your garden neat effortless. From compact reels for small spaces to automatic rewind options for bigger gardens, there's a solution for every gardener.

Key:

- ② Products with a 2 year guarantee or more
- ③ Products that come complete with wall fixings
- ④ Products that come in a retail box
- Pack Quantity - The number of products in an outer carton
- Info - The Scandinavian product code
- More information on all our products can be found on www.hozelock.com

Auto Reel Mobile - the automatic rewind hose system

This new hybrid hose system blends the premium features of our best-selling Auto Reel range with optimum portability, for effortless watering like never before.

The hose that puts itself away... anywhere.

The Auto Reel Mobile is designed to make watering your garden easy and enjoyable – wherever you need it.

1 Automatic rewind cart with brake system

Pull out only what you need, and the hose locks in place – no sudden snaps or accidents. When you're done, one simple tug and it renews smoothly, saving the hassle of winding it back by hand. This convenient feature not only protects the hose from damage but also keeps your garden space tidy and efficient.

2 Large wheels for easy movement

Heavy hoses shouldn't weigh you down. The wide wheels traverse effortlessly across your lawn or patio, so you can water every corner without struggle.

3 Front kickstand for stability

No more tipping or wobbling. Just fold down the kickstand and enjoy steady watering.

4 Premium kink-resistant hose

Kinks can ruin your peace while watering. Our hose stays smooth and flexible, so you get a steady stream, consistently.

5 Child lock for peace of mind

Keep little hands safe and your hose secure, so you can relax while gardening.

6 3-in-1 Nozzle for every task

Whether you're gently watering delicate flowers, quickly soaking a veggie patch, or cleaning garden tools, this nozzle has you covered.

7 Adjustable handle and feeder hose storage

Take the strain out of moving the reel by setting the handle to a height that suits you. Store the feeder hose neatly when not in use to avoid drips and keep your space tidy.

8 Accessory basket

Store your tools and attachments close by, so everything you need is within reach.

Automatic Rewind**Pro**

Auto Reel - the automatic rewind hose reel

Watering your garden and storing your hose is so easy with Auto Reel.
It smoothly unwinds only the amount of hose that you need.

When you are finished, the automatic rewind system effortlessly stores the hose away, with no kinks or tangles, saving you time and frustration.

Flexible for any garden

The wall hanger rotates 180°, so your hose moves with you and can fold flat when not in use, perfect for any space.

Always ready

A built-in hose stop keeps the hose ready at your fingertips, so you're never stuck searching for the end.

Keep things tidy

Handy storage on some models keeps your spray guns and accessories organised and close by, no more hunting around.

Easy to mount or move

The smart wall hanger and carry handle let you quickly fit the reel to the wall, or take it down when you want to move it elsewhere.

Safety you can trust

With a child lock and optional padlock* fixing point, your hose stays secure and safe, giving you complete peace of mind.
*Padlock not included.

HOZELOCK

Tuffhose - the ultra-strong and ultra-flexible hybrid hose

The hybrid hose that combines the flexibility and lightness of fabric with the strength of PVC.

What makes Tuffhose unique:

- ✓ **Extreme flexibility:** easy to unroll, handle, and store, without knots.
- ✓ **Up to 50% lighter** than a traditional PVC hose, for maximum ease of use.
- ✓ **Resistant to high pressures (up to 40 bar)** and compatible with pressure washers.
- ✓ **Extended service life** thanks to its UV-resistant **textile outer**, suitable for outdoor storage.
- ✓ **Anti-twist, anti-crush and anti-kink:** always ready for use.
- ✓ **Long term warranty of up to 30 years**, guaranteeing the high performance of Tuffhose.

Tuffhose is the perfect ally for gardening, DIY, and cleaning tasks, suitable for all types and sizes of surfaces.

No more heavy hoses that crush or twist!

Includes:

Advanced Hybrid Technology:

- 1 Supplied with fittings already mounted on the hose and 100% compatible with all accessories.
- 2 Anti-leak and anti-kink technology thanks to the connector sleeves.
- 3 Dura-Tech PVC core: for pressure resistance and unbeatable strength.
- 4 Tuff-Fibre braided textile sheath: for exceptional maneuverability and maximum durability.
- 5 ø18mm when filled with water.
*Phthalate free <0.1%

Watering Hose - durable hose for every garden

Ultraflex

A flexible, frustration-free hose built to keep up with real gardens.

The Ultraflex Hose is made for gardeners who want the freedom to move with zero frustration.

- **Stays strong in any weather** – UV and frost protection means your hose won't crack or fade.
- **No more wrestling with twists** – TNT™ anti-twist technology keeps your hose tangle-free, so water flows smoothly every time.
- **Soft & Flex™ technology** – Makes the hose super flexible and comfortable to handle, even when fully extended.
- **Smooth inner layer** – Ensures strong, consistent water flow with every use.

Watering Hose - durable hose for every garden

Ultramax

Built to take on anything, so you don't have to.

The Ultramax is our toughest hose yet, made for gardeners who need strength without the struggle. Whether you're dragging it across gravel or watering in freezing temps, this hose is up for the challenge.

- **No cracking. No fading** - Weatherproof with UV and frost protection to handle year-round use.
- **Crush-resistant design** - Foamed PVC structure stands up to pressure so it won't flatten or split under strain.
- **Tangle-free watering** - TNT™ anti-twist technology keeps the hose from kinking or tangling, giving you hassle-free watering from start to finish.
- **Flexible, even when full** - Soft & Flex™ technology makes the hose easier to manoeuvre without compromising strength.
- **Smooth inner layer** - Ensures strong, consistent water flow with every use.

Watering Hose - durable hose for every garden

Ultimate

For gardeners who want it all.

The Ultimate hose is designed for gardeners who want premium performance without compromise. Whether you're tackling a big garden or watering every day, this hose makes it feel effortless.

- **Reliable all year round** - Weatherproof with UV and frost protection, so it won't crack or fade – no matter the season.
- **Strong where it matters** - Reinforced PVC layering gives you extra strength and durability, even during heavy-duty use.
- **Easy to handle, every time** - Soft & Flex™ technology makes the hose ultra-light and flexible, so it glides around corners and beds with ease.
- **Tangle-free watering** - Anti-twist technology means no more frustrating kinks or snags – just smooth, uninterrupted watering.
- **Comfort in every coil** - A foamed Soft & Flex™ layer adds cushioning and bendability without sacrificing performance.
- **Smooth inner layer** - Ensures strong, consistent water flow with every use.

Not all connectors are made equal, see what makes ours the best

Built to last. Designed to deliver.

Every part of our design is crafted with purpose, so you get a secure, leak-free connection that works first time, every time.

1 Water Stop Valve (AquaStop only)

Stops water flow instantly when you disconnect your accessory – no splashing, no wasted water. Made from tough ABS for maximum durability.

2 Connection Grip

Triple locking system ensures a rock-solid connection that won't pop off under pressure. Built with Delrin® Acetal and silicone for a smooth, effortless fit.

3 Outer Sleeve

Tough on the inside, soft on the outside. The impact-resistant, strong and durable ABS body, is wrapped in a soft-touch grip so it's easy to handle, even when wet.

4 Tough Inner Core

Crafted from high-performance Delrin® Acetal – engineered to combine the strength of metal with the flexibility of plastic for long-term reliability.

5 Hose Clamp Teeth

Our polypropylene grip teeth are designed to withstand repeated use without wearing down, keeping your hose firmly in place.

6 Flexible Hose Tail (Plus and Pro only)

Designed to bend without breaking. The flexible yet strong tail prevents kinks and ensures a secure hose connection that stands the test of time.

Oscillators with 3D control

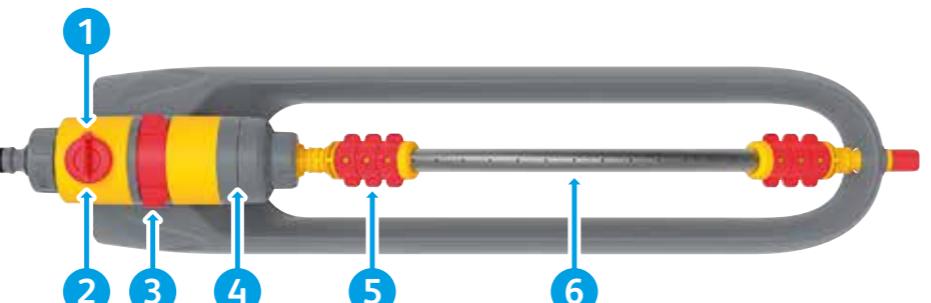

1 Flow Control

Easily adjust the spray to target exactly where your plants need water, saving you from wasting a single drop.

2 Stop Water at the Sprinkler

Move and adjust your sprinkler without getting wet, keeping you comfortable and in control.

3 Adjustable Direction

Choose how far to water on each side of the sprinkler.

4 Class Leading Motor

Giving larger coverage without moving the sprinkler.

5 Adjustable Width (Pro only)

Select the number of jets required for your task, cutting water waste and watering smarter.

6 Metal Spray Bar

High-precision jets deliver a sharp, consistent spray – ensuring every plant receives just the right amount.

Automatic Watering

Take the Chore Out of Watering

Summer means your plants need more water, often daily, turning watering into a tedious chore. An Automatic Watering system frees you from this hassle, giving you back precious time to enjoy what really matters.

Water Smarter, Not Harder

It delivers water precisely where your plants need it most – the roots – cutting waste from evaporation or overwatering, saving water and reducing your bills.

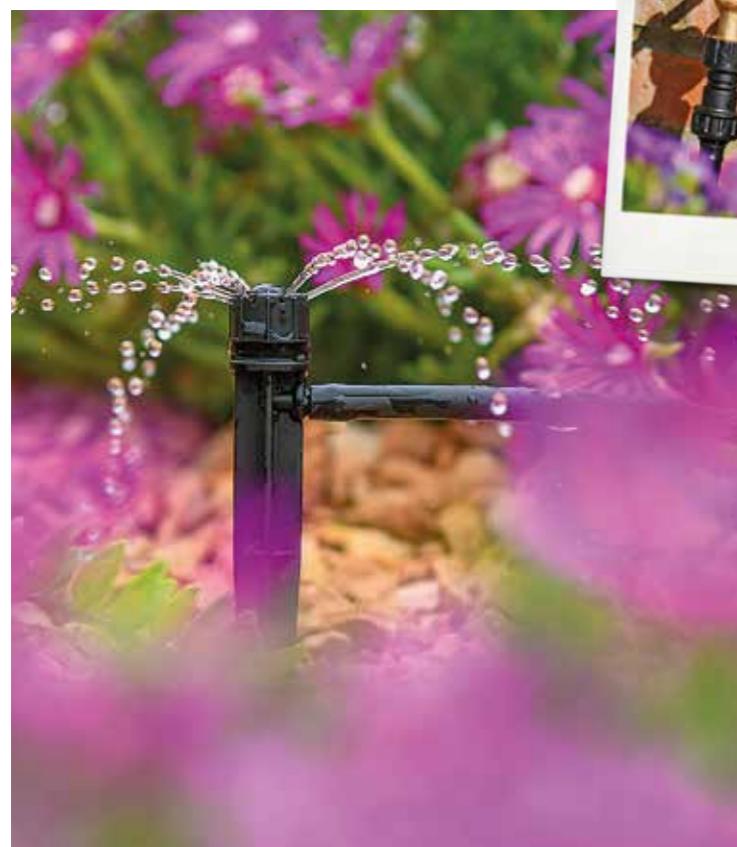

Healthier Plants, Happier Garden

Consistent, controlled watering helps your plants thrive, preventing damage caused by too little or too much water. The result? A garden that's healthier, more vibrant, and easier to maintain.

Peace of Mind When You're Away

Heading out for the weekend or taking a summer holiday? No problem. Your watering system continues to care for your garden while you're gone, no more relying on neighbours or returning to wilted greenery.

Automatic Watering

Automatic Watering delivers water straight from your tap to your plants through a hidden network of slim pipes and outlets, taking the guesswork out of gardening.

Whether you want a simple setup to keep your container plants thriving while you're away or a fully automated system to nurture your entire garden, this smart solution saves you time, water, and worry.

Imagine coming home after a busy day at work and not having to worry about watering your garden. Automatic Watering means you can focus on enjoying your outdoor space.

Why Automatic Watering?

Why Choose Automatic Watering?

Have some time off

During the summer months your plants need an increased amount of water, which can sometimes become a bit of a chore.

Automatic Watering systems take this burden away meaning you have more time to do other things.

Water more efficiently

Automatic watering systems deliver precise, deep hydration directly to plant roots, encouraging stronger, deeper root growth. This helps plants become more resilient to dry conditions and better equipped to thrive. By reducing water loss from evaporation and inefficient watering, these systems also help conserve water.

Not only does this save water - it can also lower your water bills. Some water companies permit dripper use during restrictions - always check with your local provider first.

See your garden bloom

Many plants struggle with inconsistent watering, which can leave them stressed or more vulnerable to disease. Regular, controlled watering supports healthier, more vibrant plants - so your garden looks its best with less effort.

Get out more

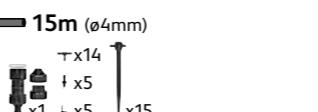

Automatic Watering systems allow you to be away from home with the assurance that your garden continues to be watered.

No more bothering the neighbours and family or coming back to dead plants.

Ready-to-Use Automatic Watering Kits - including a Water Timer

Choose from four Ready-to-Use kits to suit your setup. Each kit includes a water timer and all components needed for automatic watering - ideal for multiple pots, flowerbeds, or vegetable patches. Quick and easy to install.

Solar Select - Solar Automatic Watering Kit

Drip Irrigation Kit with Solar-Powered Autonomous Timer for 20 Pots.

Imagine a watering system that takes care of your plants completely on its own, powered entirely by the sun. Solar Select's smart, solar-powered timer frees you from daily watering chores while giving each pot exactly what it needs to thrive.

1 100% Solar-Powered Autonomy

Harness the power of the sun with a large solar panel and rechargeable batteries - no plugs or wires, just worry-free watering wherever you want it.

2 13 Preset Programs

Choose from a variety of watering schedules tailored to different plants and conditions - flexibility made simple.

3 Manual Watering On Demand

Need a quick water boost? The manual function lets you water for up to 20 minutes whenever your plants call for it.

4 Delayed Watering Options

Rain on the way? Set watering to pause for 1, 3, or 5 days, and it will turn on automatically to continue watering.

5 Total Control Over Watering

Adjust duration, frequency, and water volume to suit each plant's unique needs, ensuring healthy growth without waste.

Build Your Own: A Tap Connection - connect the system to your tap

The Heart of Your System

Every successful watering setup starts at the tap. It's the essential link between your water supply and the rest of your system, so getting it right matters.

For the best results, always use a pressure regulator to maintain consistent flow and prevent damage.

Remote Connection

Not every part of your garden is close to a tap – but that doesn't mean it can't be watered.

Cut a suitable length of garden hose.

Attach hose connectors to each end.

Connect one end to your outdoor tap using a threaded tap connector.

Connect the other end to the Pressure Regulator and begin setting up your watering system.

- Hose - Page 14-21, 38-39, 42
- Tap Connectors - Page 23-24
- Hose Connectors - Page 25-27

Direct Connection

Best for setups located close to the tap.

Screw the Pressure Regulator directly onto your outdoor tap or onto a Hozelock Automatic Water Controller, then connect the required length of 13mm or 4mm supply hose.

- Controllers - Page 37, 40-41

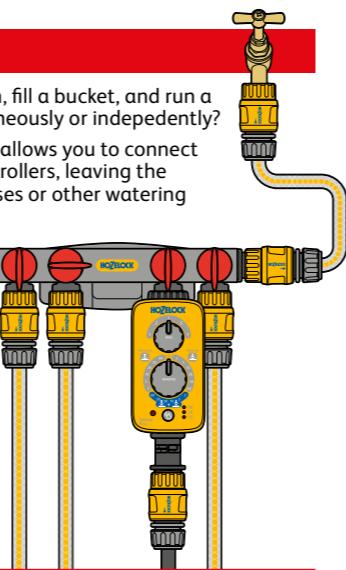

Flexible Connection

Need to water your garden, fill a bucket, and run a hose - all at once - simultaneously or independently?

The 4-Way Tap Connector allows you to connect 2 automatic watering controllers, leaving the remaining 2 outlets for hoses or other watering accessories of your choice.

This setup offers maximum flexibility for watering different sections of the garden.

- Multi Tap Outlets - Page 24

Mechanical Controller

The Hozelock Mechanical Controller is a battery-free dial-operated device that is ideal for short watering sessions.

- It is perfect for use with an irrigation system that runs for a single, set period or when filling a pond, water butt, or paddling pool without the risk of overflow.

Build Your Own: C Drippers for precise watering

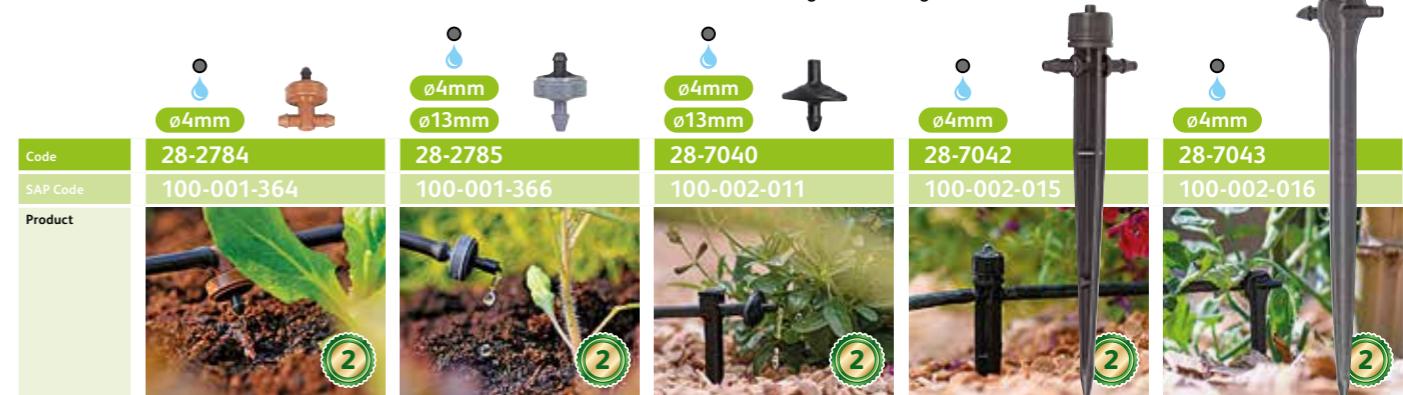

Keep your plants healthier and happier by delivering water exactly where it's needed – at the roots.

Drippers gently release water at the base of each plant, helping to prevent leaf scorch and reduce the risk of disease caused by excess moisture. This targeted approach is not only more effective, but also incredibly water-efficient, making every drop count.

Micro Drippers deliver a slow, precise supply of water directly to the base of the plant – ideal for efficient, targeted watering.

They are very versatile and can be used in pots on balconies or to water shrubs in your flowerbed.

Hozelock's drippers feature pressure-compensating technology to deliver a consistent flow – even on slopes or extended runs of irrigation tubing.

Build Your Own: D Sprinklers for larger areas

Sprinklers deliver a fine spray over a larger area to water multiple plants.

Sprinklers offer a fast, efficient way to water multiple plants at once - perfect for saving time without compromising on care.

With options to adjust spray angles, coverage, and flow rate, you can tailor the watering to suit your garden's layout and ensure water reaches where it matters most.

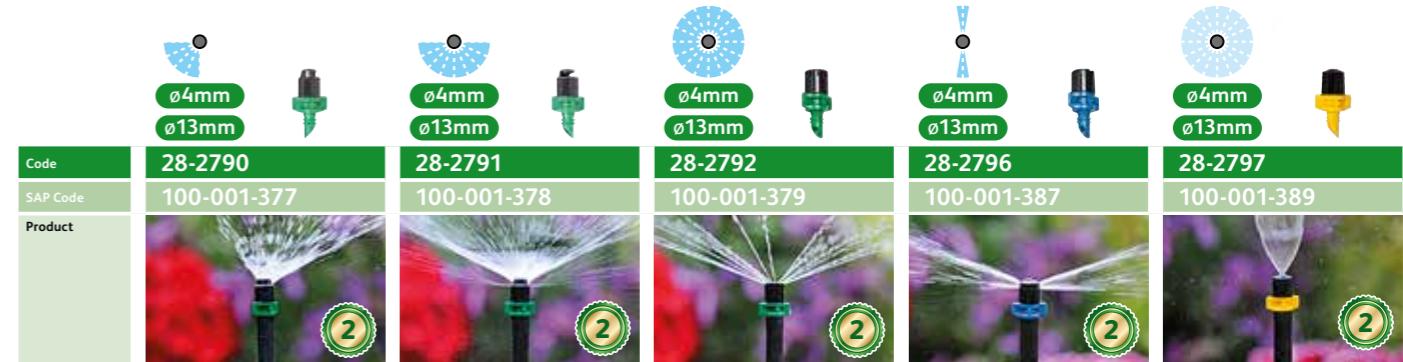

Ideal for your flowerbeds, vegetable patches, and hedgerows.

Automatic Watering – without the tap!

Control your watering, inside and out, without the need for your tap!

Our self-watering products make these the perfect choice for holiday watering.

Aquasolo® Universal - watering cones

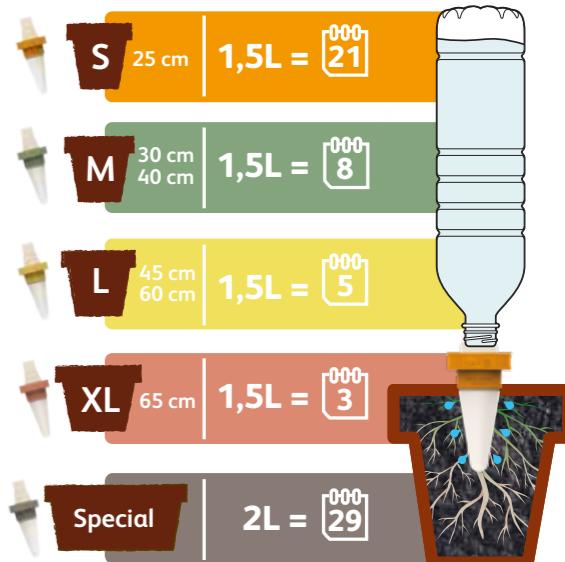

Keep your plants hydrated the easy way with Aquasolo® – clever ceramic cones that slowly release water right where it's needed.

Now with a universal adapter, they fit most 0.5L to 2L bottles – no screwing required. Just insert and go!

Choose from 5 cone sizes to suit your pot or plant type, and use the stabiliser (included in the 3+1 pack) for extra support with larger bottles.

Ideal for stress-free watering at home or while you're away.

Place next to your indoor plants to drive additional sales.

Aquasolo® Indoor - terracotta automatic watering pot

For your eco-conscious shoppers who want to experience a smarter, more sustainable way to keep their plants thriving – while saving time, water, and effort.

Micro-porous terracotta pots deliver gentle, buried watering directly to the roots. Save over 50% more water than traditional surface watering methods. Promotes deep root growth for stronger, healthier plants. Waters automatically, giving you more time to enjoy your garden instead of tending to it.

Automatic and Eco-Friendly Watering

Key Benefits

- 50%+ water savings vs. surface watering
- Deep root hydration promotes healthy growth
- Automatic watering saves time
- Porous walls allow slow, steady water release

How It Works

- Dry soil pulls water from the Olla
- Moist soil reduces pull, slowing water release

Self-regulating flow

- Watering adjusts to plant needs
- Prevents over or under-watering

Bokashi composter - kitchen composter

How to use it?

- 1 Pour in your food waste*
- 2 Pack the waste to eliminate air pockets
- 3 Place 20g of Bokashi activator between each layer of waste and close the lid
- 4 After 2-3 weeks, collect the liquid fertiliser. This juice is used as plant fertiliser, dosage 1/100
- 5 Once the Bokashi has been filled, leave to ferment for 14 days, then empty the contents of the bucket into a garden compost bin or bury it in the ground

Depending on the waste, it may take longer to extract the "juice"

* Suitable: All food waste – raw or cooked – including meat, fish, dairy, bread, pasta, rice, eggshells, coffee grounds, and tea bags (plastic-free).

* Avoid: Large bones, excess oil or liquid, salty or acidic foods, hard pits, glossy paper, garden waste, and non-organics (e.g. plastic, metal, glass). These can slow fermentation and reduce the composter's efficiency.

HOZELOCK

EasyMix 2-in-1 Composter

Transform kitchen scraps and garden waste into nutrient-rich compost – faster, cleaner, and with less effort.

Compost 3x Faster – Unlike traditional composters, this tumbling design creates rich compost in just 6-8 weeks.

Effortless to Use – Simply roll the drum to mix the contents and accelerate decomposition. No turning with a fork required.

Easy Distribution – Once ready, just roll the drum to where your plants need it and spread your homemade compost directly onto the soil.

Boost Plant Health with Compost Juice – The built-in reservoir collects a powerful liquid fertiliser. Easily apply it with the Click & Spray hose attachment for deeper nourishment.

Pest-Resistant & Odour-Free – A fully enclosed and lockable lid keeps the odour in and unwanted visitors out.

Compact & Versatile – Small enough for gardens, balconies, or garages. Big enough to make a real difference.

Eco-Conscious Construction – Made from more than 90% recycled plastic and fully recyclable when its job is done.

How It Works:

- 1 Add your garden and kitchen waste, then secure the lid.
- 2 Rotate the drum regularly to mix and speed up composting.
- 3 After 6-8 weeks, roll the drum to your garden and spread your compost.
- 4 Use the collected compost juice via the reservoir to nourish your plants.
- 5 Attach your hose to the Click & Spray applicator and feed your soil.
- 6 Rinse the tank after each use to keep things clean and ready to go.

* **Waste Suitable for composting:** Fruit and vegetable scraps, coffee grounds, tea bags (plastic-free), garden clippings, soft prunings, dead flowers, shredded paper, cardboard, and dry leaves.

* **Waste Not suitable:** Meat, fish, dairy, cooked food, oily waste, pet waste, glossy paper, or diseased plants.

BioMix - the eco-friendly solution to take care of your plants

Transform common garden plants like nettles and comfrey into a powerful, nutrient-rich feed – naturally. Perfect for gardeners who want to nourish their plants and protect them from disease, all while reducing chemical use and waste.

This clever closed tank system makes the process clean and efficient. The integrated mixing action speeds up decomposition, while the sealed design locks in strong smells – so your garden stays fragrant.

Once your mixture is ready, the easy-to-use filter and built-in tap allow you to drain off your homemade fertiliser with zero mess. It's a simple, satisfying way to feed your plants and care for the environment.

How it works:

- 1 Harvest approx. 1kg of nutrient-rich plants like nettles or comfrey and add them to the tank.
- 2 Pour in 10 litres of water.
- 3 Close the lid and give it a good stir every 2 days to help break down the leaves.
- 4 After 10 – 15 days, once the bubbles stop rising, your mixture is ready.
- 5 Filter out the solids and collect the rich liquid feed using the integrated tap.
- 6 Store in an opaque container to preserve nutrients.
- 7 Dilute the liquid (between 5% – 20% depending on use – see booklet for guidance) and apply with a sprayer or watering can.

Use it with a sprayer or watering can.

Gas Thermal Weeders - weed without chemicals

Take control of weeds without harsh chemicals or open flames.

Advanced infrared technology – Delivers powerful results with peace of mind. The invisible flame is safely contained within the shield, rapidly heating the ceramic plate to a scorching 800 °C, causing a thermal shock that destroys weeds down to the root.

Infrared safety, maximum performance – Safe and effective weed control with no exposed flame, ideal for family gardens and public spaces.

Covers more ground, quicker – The large 12 x 20cm ceramic plate is perfect for treating patios, driveways, and larger garden areas efficiently.

Dual fuel flexibility – Use it your way: attach a gas cartridge for up to 3 hours of cordless weeding or connect a gas bottle for an incredible 122 hours of runtime.

Economical and efficient – Up to 4x more cost-effective and 2x faster than standard gas cartridge weeders*.

*compared to a standard Gas Weeder operating with a gas cartridge

HOZELOCK

Sprayers

Smarter Spraying, Stronger Sales

Hozelock's sprayers are designed for comfort, control, and eco-conscious performance – ideal for a wide range of garden care liquids including feeds, weedkillers, and pest treatments.

With models tailored to different applications, they offer faster coverage, less bending, and improved spray accuracy to reduce overspray and minimise waste.

Refillable and durable, the range is supported by a full suite of accessories and spares – driving upsell opportunities and encouraging repeat purchases.
